

PowerSafe V Batteries

PowerSafe V range of valve regulated lead acid batteries have been designed specifically for use in applications which demand the highest levels of security and reliability. They have a long service life and an excellent high rate of performance.

PowerSafe V batteries deliver superior performance while occupying less space than conventional standby power batteries. The use of V-0 rated, flame retardant, ABS plastic for the thick wall containers and covers offers high mechanical strength with excellent safety features. Oxygen evolved at the positive plates diffuses through microporous separators to the negative plates and, by a series of chemical reactions within the cell, recombines to form water. Each cell incorporates its own safety valve that allows the controlled release of gas when pressure builds up within the cell.

Specifications

- Capacity Range: 47Ah-516Ah
- Available in 2, 4, 6 & 12 volt blocs
- UL94 V-0 flame retardant container and cover
- High reliability
- Long service life
